

Instructions for receiving NFT after donation

1. Using Chrome browser, go to <https://metamask.io> and install the chrome extension. Create a new wallet (follow the instructions online). Be sure to record the secret 12-word phrase securely (it is the only way to access the account).

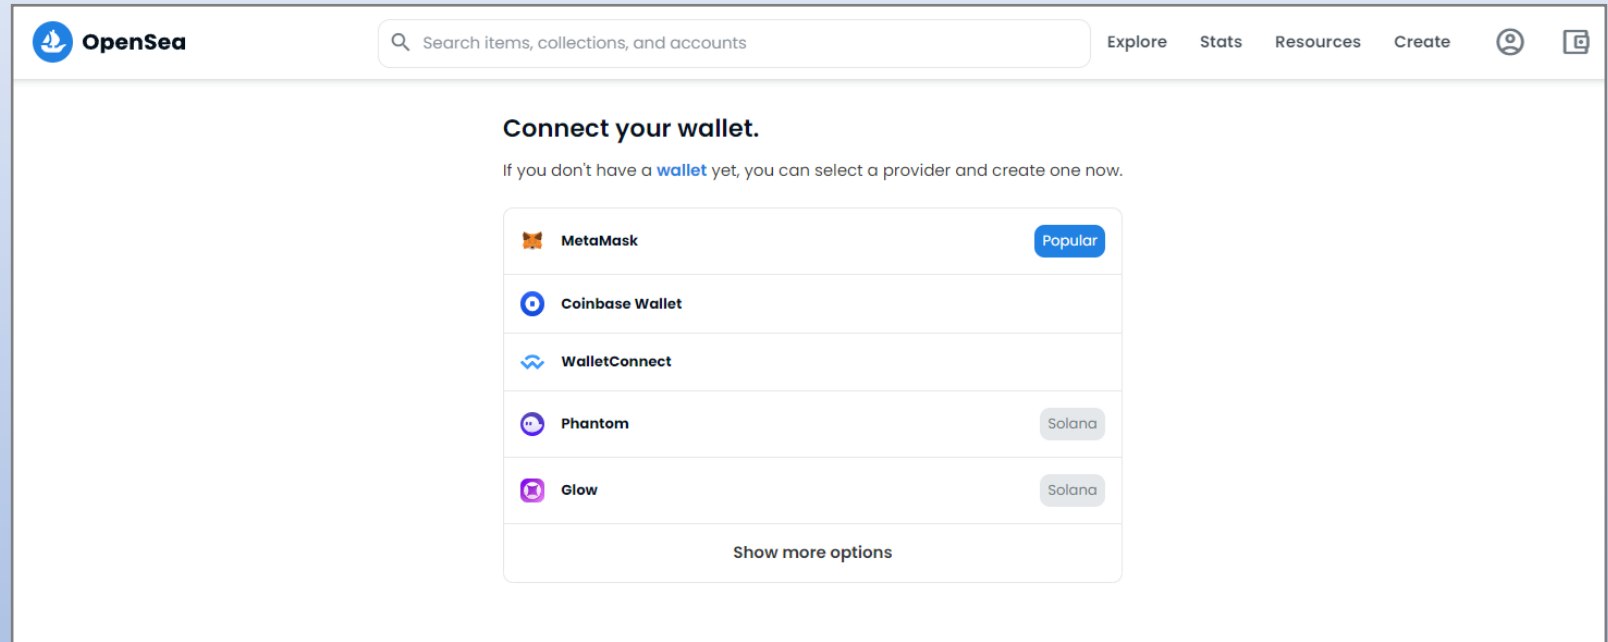

2. Click on the wallet address to copy it (Blue Arrow). Paste the address and email to SATA Fund Raising Team: fundraising@sata.com.sg

3. The NFT will then be transferred to your wallet. (Take note that this is irreversible so please ensure that your wallet address is correct).

4. Go to <https://opensea.io/> and log in using your MetaMask ID. You will be asked for your password.

5. Click on user icon (orange circle in this case, see image below)

6. If your NFT is not seen in the collection, click on “hidden” in “More” tab. Click on your NFT to see the details.

The screenshot displays the OpenSea user profile for 'Calmblesky'. The profile picture is an orange circle, highlighted by a red arrow with the number '5'. Below the profile name, there are tabs for 'Collected 6', 'Created 7', 'Favorited', 'Activity', and 'More'. The 'More' dropdown menu is open, showing options: 'Offers made', 'Offers received', 'Active listings', 'Inactive listings', and 'Hidden' (with a count of 2). A red arrow with the number '6' points to the 'Hidden' option. The main content area shows a search bar and a list of NFTs, including 'AIRDROP-PASS' (worth up to 5,000... HJE-META-PASS) and 'sata zoom' (Untitled Collection #485132382). The URL at the bottom left is <https://opensea.io/account?tab=private>.

The End
